Ulm University is a young research university with a focus on natural sciences, medicine and technology. Located in an economically strong region, the University with its more than 10,000 students offers a dynamic work environment with attractive networking and development prospects.

The Faculty of Medicine, Department of Internal Medicine I (Gastroenterology, Endocrinology, Nephrology and Nutrition Sciences; Head: Professor Dr. Thomas Seufferlein), is seeking to fill the position, starting as early as possible, of

Professor (W3) of Endocrinology and Diabetology (m/f/d)

The University is seeking to increase the proportion of women in research and teaching and particularly encourages qualified female scientists to apply for this position. Severely disabled applicants with equal aptitude will be given preferential consideration.

The successful candidate should represent Endocrinology and Diabetology in research, teaching and patient care and will be head of the Division of Endocrinology and Diabetology within the Department of Internal Medicine I.

The candidate is expected to have a broad and longstanding experience in clinical Endocrinology, Diabetology. Furthermore, the candidate should have an independent research profile as demonstrated by an outstanding track record in extramurally funded research and publications in clinical as well as basic science and should have proven to be able to translate research from bench to bedside. The successful candidate is expected to actively participate in the research cores of Ulm University, e.g. the Boehringer Ingelheim Ulm University BioCenter (BiU), the Research Training Groups and the Collaborative Research Centres. There are further options for cooperations with other Departments and Institutes with a focus on Endocrinology and/or Diabetology (including Pediatrics, Gynecology and Comparative Molecular Endocrinology).

Teaching responsibilities include lectures and courses for students of medicine, dentistry, and molecular medicine.

Employment requirements are completed university studies, a doctoral degree, the habilitation or equivalent scientific achievements as well as a training as medical specialist in endocrinology and diabetology (§ 47 LHG).

Seize the opportunity and join us in shaping the future of the University!
